# MOBILE APP DEVELOPER (M/F/X) FOR SOLAR ENERGY

**Thalheim bei Wels, Austria**
**Full time**

**Your tasks and responsibilities:**
In our newly emerging team, you will take the lead in developing our apps for the Solar Energy business unit. With these customer-focused apps you will be actively involved in the realization of our vision 24 hours of sun:
/ Developing native apps
/ Designing the architecture of mobile apps
/ Developing new features
/ Further development and optimization of existing apps
/ Close collaboration with the product owner
/ Team-oriented collaboration with stakeholders (product owner, technical product management, UI/UX designers, system architects, etc.)

**Requirements:**
/ Completed technical education (FH, University) with focus on mobile computing or software engineering
/ Professional experience in mobile development
/ Good knowledge in app development
/ Hands-on mentality and enthusiasm for apps
/ Good knowledge of German as well as English

**Benefits:**
/ Flexible working hours and partial home office option
/ Company restaurant with varied and seasonal cuisine and subsidized meal plan
/ Parking spaces and charging stations for electrical cars
/ Buddy program and global training catalogue
/ Company kindergarten and toddler group in Sattledt with year-round care
/ Company events (year-end party, summer party, department excursions …)
/ Sports activities (beach volleyball court, payment of entry fee for running events …)

For this position we offer a salary of at least EUR 43,750,-- gross per year. Depending on schooling, training and experience, a willingness to overpayment exists.

Do you want to be part of a dedicated team where your energy makes an impact? Then Ms Julia Pichler is looking forward to your meaningful online application.
