Security Engineer (f/m/d)

Description

As a **Security Engineer**, you…

- participate in the cross-departmental Security Group to review threats and vulnerabilities and define mitigation plans
- support the development team members on secure coding practices and in hardening our applications and deployments
- coordinate penetration tests and audits with external security contractors
- define our security standard according to OWASP ASVS and ISO/IEC standards
- support product managers and architects designing secure software solutions

Requirements

You have ...

- completed a technical degree (HTL, University, FH)
- at least 3 years of experience working as a Security Engineer or Java Developer with focus on Security
- good knowledge of webapplication vulnerability types in the OWASP Top Ten
- a good understanding of authentication concepts like OAuth, SAML, JWT
- the feeling that your English is the cream of the crop, you know we mean the yellow of the egg and you also are fluent in German.
- a good sense of humor. Please!

Benefits

What we offer

- a minimum annual gross salary of EUR 60,000 OTE if all requirements are met
- a higher salary is possible if requirements are exceeded
- free parking spaces and NO TRAFFIC JAMS when you are from the south or centre of Linz
- quite probably the most beautiful and awesome offices in Austria
- electric stand-up desks, fully climate-controlled offices and only latest generation hardware to work on
- Working from home option
- room to personally evolve and time to learn as an expert in your field
- opportunities for the conferences and education that YOU want
- epic parties and company trips, hikes and sports events, daily runs if you want and a couple of lakes to chill out in the neighbourhood
- showers to freshen up after sports, subsidised lunch, free drinks, a fleet of Scooters, (electric) company cars to borrow and much more awesome stuff
- a special sense of humor. Ok we try... mostly... a little. No honestly we are really funny! Word of honor!
